## SENIOR RUBY ON RAILS DEVELOPER

I am Full Stack Ruby on Rails Developer with 5+ years of experience. Proficient in Ruby, Rails, React, and Elasticsearch, with hands-on expertise in Hotwire and IoT (Arduino). Active open-source contributor with a proven track record of delivering successful projects, such as RuboCop, RSpec and etc.

## EXPERIENCE

### Senior Full Stack Developer

SoftServe

2021 – Present

- Developed and optimized healthcare and volunteer support platforms, ensuring high performance and security.
- Led technical aspects of the Schools Search project, including deployment, infrastructure, and business analysis.
- Delivered high-quality features using Ruby on Rails, Elasticsearch, Hotwire, Node.js, React, AI prompting, and Docker.

### Full-Stack Developer

Maps related project

2023 – Present, Startup

- Built and maintained a cadastral map application enabling Ukrainian users to access detailed parcel information.
- Designed and optimized database structures, ensuring performance, security, and reliability.
- Delivered full-stack features with Ruby on Rails, Angular, Hotwire (Turbo/Stimulus), PostgreSQL, and Docker.
- AI moderation feature engineering

## PORTFOLIO

## LANGUAGES

- English (Upper-Intermediate)
- Ukrainian (Native)

## Full-Stack Developer

School Search Platform

2023–2025, Full-time

- Led team and technical decisions, ensuring smooth collaboration and effective communication.
- Deployed applications and managed infrastructure to support platform stability and growth.
- Conducted business analysis to align development with user and organizational needs.
- Built and maintained full-stack web applications with a focus on scalability and usability.
- Designed and optimized databases, improving data integrity and search performance.
- Ensured high code quality through testing, code reviews, and best practices.
- Enhanced application performance and optimized resource usage.
- Maintained security and compliance standards throughout development.

**Technologies:** Elasticsearch, Ruby on Rails, Ruby, TailwindCSS, Importmaps, StimulusJS, TurboRails, RSpec, Chewy, SwiperJS, TippyJS, Capistrano, MJML, ViewComponent, TinyMCE, Kibana, Server Management, SEO.

## Full-Stack Developer

School Media Platform

2024–2025, Full-time/Part Time

- Developed and supported a modern education search and content platform focused on schools, articles, events, and job opportunities.
- Implemented interactive search filters for institutions by city, type of school, and age group to improve user discovery.
- Built and optimized the catalog and directory features (“Каталог закладів”) to deliver accurate, fast, and relevant results.
- Managed content workflows including articles, authors, events, and vacancies, ensuring high editorial quality and timeliness.
- Ensured site performance, security, and compliance across platform operations.
- Collaborated across teams (product, design, editorial) to shape UX and feature prioritization.
- AI integration to automate business processes.

**Technologies:** Ruby on Rails, Elasticsearch, Node.js, Bootstrap/Tailwind, StimulusJS, Turbo Rails, RSpec, ViewComponents, MJML, Chewy, Kibana, Importmaps, Cursor, Different AI models integration (such as Gemini, Deepseek, ChatGPT) to automate bussiness processes, SEO, etc.

## Full-Stack Developer

Information & Support Platform for Ukrainian Families in Poland

2022, Full-time

- Built and maintained a multilingual information portal helping Ukrainian families with children integrate in Poland — covering education, health, legal issues, aid, etc.
- Designed and implemented an interactive map of help centers (Spilno HUBs) so users can find nearby support hubs with hours and contact info.
- Developed content management workflows for various topics: schooling, legal rights, child safety, hotlines, etc., ensuring timely, accurate, accessible information.

- Ensured usability and clarity for sensitive topics (hotlines, psychological help, anti-violence), making sure navigation is intuitive and information easy to find.
- Handled backend tasks such as deployment, server management, performance, and security to ensure reliable access for users under varying network conditions.
- Collaborated with stakeholders (e.g. UNICEF, local NGOs) to gather requirements, feedback, and updates.

### Full-Stack Developer

Youth & Community Well-Being Platform  
Ukraine

2024-2025, Full-time/Part Time

- Created web platform enabling young people across Ukraine to share their opinions via surveys to assess and improve youth well-being in their city ("Індекс благополуччя молоді").
- Built interactive city-based dashboards and indices, allowing comparison across many cities and visualizing trends from user responses.
- Designed and implemented content areas: news, podcasts, ideas bank ("Банк ідей"), knowledge hub ("Хаб знань"), and partner rewards ("Отримай подарунок") for participant engagement.
- Handled survey forms, sign-ups, and reward redemption workflows, ensuring high user participation and UX simplicity.
- Ensured performance, security, and reliability to support many users across different regions under varying infrastructure conditions.
- Collaborated with stakeholders like UNFPA and the National Academy of Sciences Demography & Social Research Institute for content validation, data privacy, and social impact alignment.

**Technologies:** Ruby on Rails, Node.js, Bootstrap, JQuery, RSpec, Rubocop, data visualization, content management, responsive design, user account / reward systems, mapping or city-based geodata, secure infrastructure.

### Full-Stack Developer

Treadmill Doctor

2023, Part-time

- Developed and supported an e-commerce platform providing treadmill and fitness equipment parts.
- Improved application performance, database reliability, and code quality through testing and optimization.
- Worked across the full stack with Ruby on Rails, MySQL, StimulusJS, Node.js, and Docker.

**Technologies:** Ruby on Rails, Node.js, Bootstrap, JQuery, RSpec, Rubocop, SEO, Performance improvements.

## SKILLS

- **Programming & Frameworks:** Ruby, Golang, Ruby on Rails, Node.js, Angular, React, Hotwire (Turbo, StimulusJS), Bootstrap, TailwindCSS
- **Databases & Search:** PostgreSQL, MySQL, Elasticsearch, Chewy, Database Design & Management
- **Testing & Code Quality:** RSpec, Jasmine, MochaJS, Automated Testing, Code Quality
- **DevOps & Infrastructure:** Docker, Jenkins, Capistrano, Deployment Automation, Microservices Architecture, Kafka, Server Management, Security & Compliance
- **Tools & Libraries:** Webpack, Importmaps, ViewComponent, TinyMCE, MJML, SwiperJS, TippyJS, Electron, Kibana
- **Professional Skills:** Full-Stack Development, Performance Optimization, Business Analysis, Tech Leadership, Team Collaboration, Open-Source Contribution, Scraping & Parsing, AI Prompting
- **Cloud & Hosting:** AWS, Heroku, DigitalOcean, Nginx, CI/CD Pipelines
- **Agile & Project Management:** Scrum, Kanban, Jira, Trello, Team Coordination, Scrum of scrums
- **Editors:** Cursor, VSCode, RubyMine

## EDUCATION

### Bachelor's Degree in Software Development and Internet of Things Engineering

Academician Stepan Demianchuk International University of Economics and Humanities, Graduated May 2024

## CERTIFICATIONS

### The Complete GitHub Actions & Workflows Guide

Udemy, February 2022

### Tailwind CSS – A new way to > THINK < CSS

Udemy, January 2022

### The Git & Github Bootcamp

Udemy, Dec. 8, 2025
